MORBIDITY REPORT

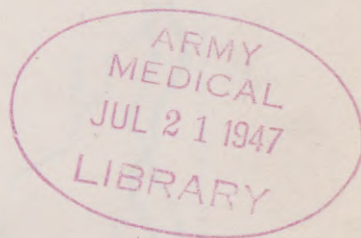

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 12 October 1946

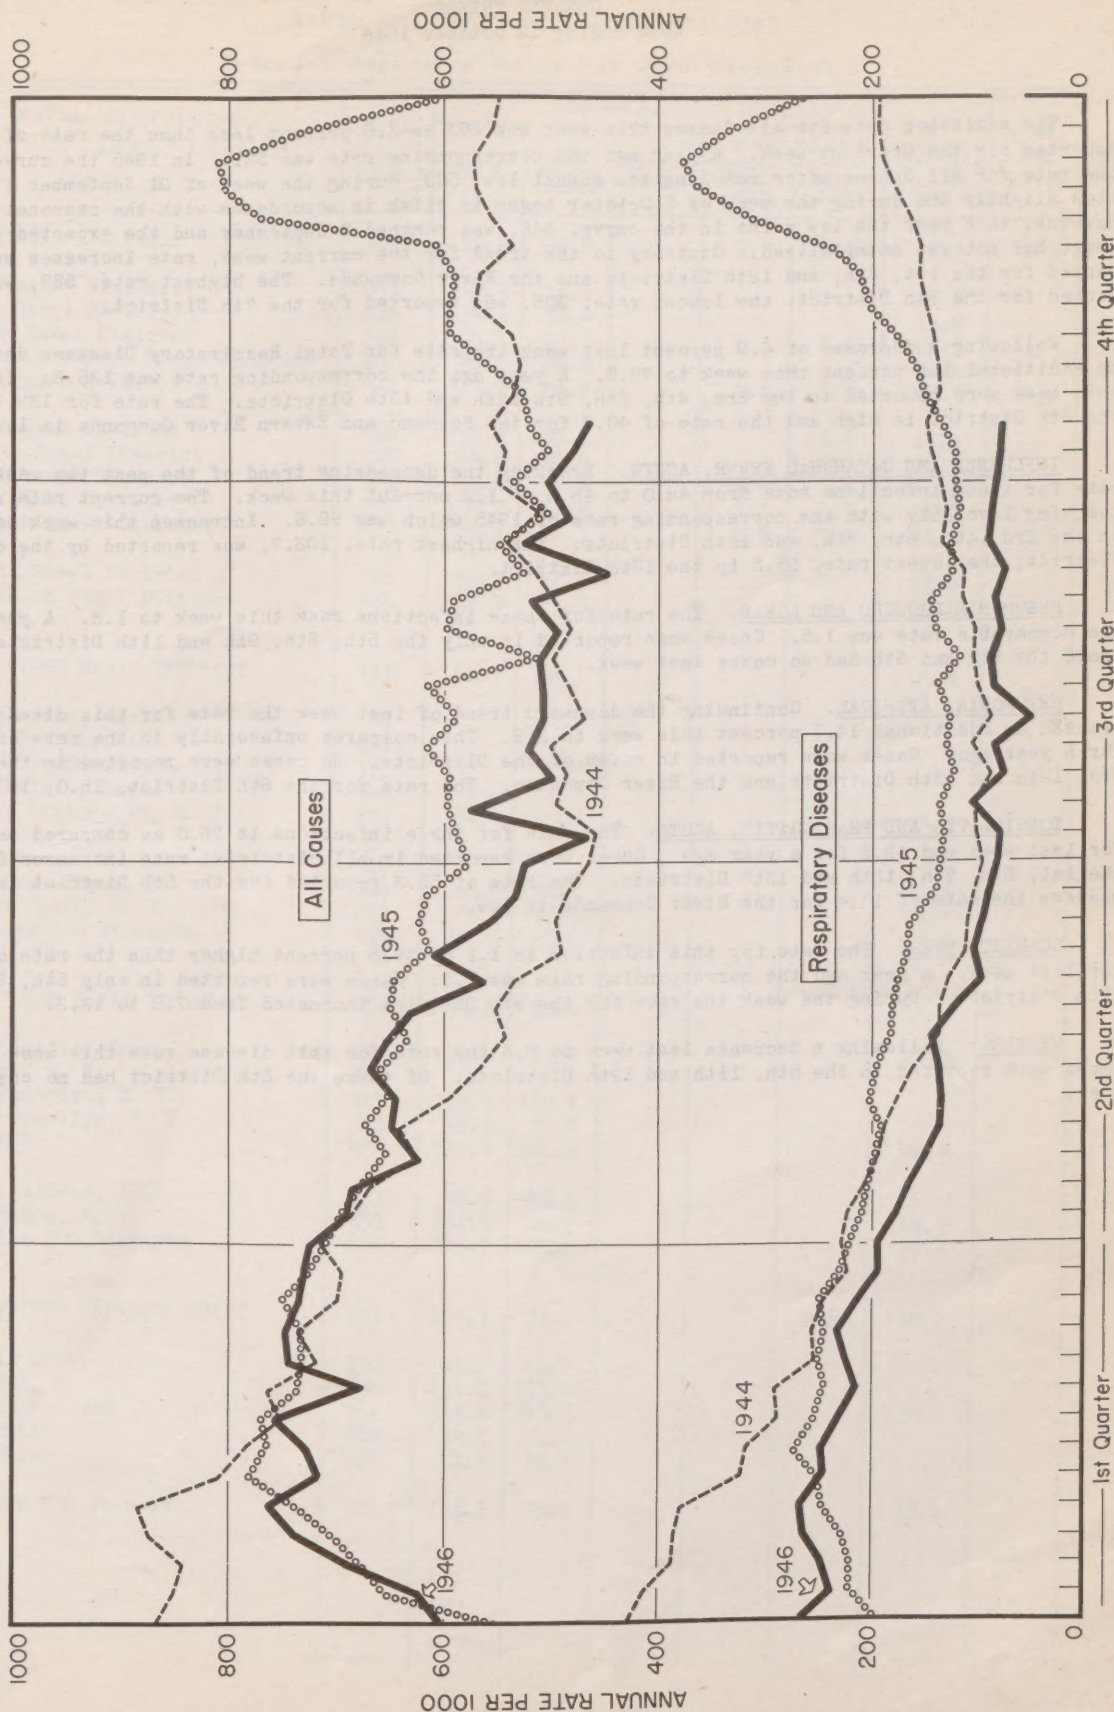

REPORT NO. 250

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944,1945,1946

CURRENT TRENDS
Week Ending 12 October 1946

The admission rate for All Causes this week was 463 or 3.5 percent less than the rate of 480 reported for the previous week. A year ago the corresponding rate was 521. In 1945 the curve for the rate for All Causes after reaching its annual low, 503, during the week of 21 September fluctuated slightly and during the week of 5 October began to climb in accordance with the seasonal cycle. However, this year the low point in the curve, 446, was reached 7 September and the expected upward spurt has not yet materialized. Contrary to the trend for the current week, rate increases were reported for the 1st, 4th, and 12th Districts and the River Commands. The highest rate, 589, was reported for the 9th District; the lowest rate, 308, was reported for the 7th District.

Following a decrease of 4.9 percent last week the rate for Total Respiratory Diseases decreased an additional 1.5 percent this week to 78.8. A year ago the corresponding rate was 135.3. Increases this week were reported in the 3rd, 4th, 6th, 9th 12th and 13th Districts. The rate for 132.9 for the 6th District is high and the rate of 40.3 for the Potomac and Severn River Commands is low.

INFLUENZA AND CATARRHAL FEVER, ACUTE. Breaking the decreasing trend of the past two weeks the rate for these infections rose from 48.0 to 48.6 or 1.3 percent this week. The current rate still compares favorably with the corresponding rate of 1945 which was 88.6. Increases this week occurred in the 3rd, 4th, 6th, 7th, and 12th Districts. The highest rate, 103.7, was reported by the 6th District; the lowest rate, 25.5 by the 13th District.

PNEUMONIA-BRONCHO AND LOBAR. The rate for these infections rose this week to 1.3. A year ago the comparable rate was 1.5. Cases were reported in only the 5th, 8th, 9th and 11th Districts. Of these the 8th and 9th had no cases last week.

PNEUMONIA, ATYPICAL. Continuing the downward trend of last week the rate for this disease decreased an additional 14.7 percent this week to 2.9. This compares unfavorably to the rate of 2.6 for a year ago. Cases were reported in seven of the Districts. No cases were reported in the 1st, 3rd, 12th and 13th Districts and the River Commands. The rate for the 6th District, 16.0, is high.

TONSILLITIS AND PHARYNGITIS, ACUTE. The rate for these infections is 26.0 as compared to 28.0 for last week and 42.6 for a year ago. Cases were reported in all districts; rate increases for the 1st, 5th, 9th, 12th and 13th Districts. The rate of 55.3 reported for the 5th District is high whereas the rate of 10.4 for the River Commands is low.

SCARLET FEVER. The rate for this infection is 1.1 or 37.5 percent higher than the rate of 0.8 for last week. A year ago the corresponding rate was 1.9. Cases were reported in only 5th, 9th and 11th Districts. During the week the rate for the 9th District increased from 7.9 to 13.3.

MEASLES. Following a decrease last week to 0.6 the rate for this disease rose this week to 0.8. Cases were reported in the 5th, 11th and 12th Districts. Of these the 5th District had no cases last week.
